

Harnessing the Power of WIC, Advancing California's Health System Reforms

We are inviting you to a summit to bring together key partners and highlight the value of WIC for health reforms.

Health care leaders in California are once again leading the nation with historic reforms to improve care and outcomes for those most in need. Our state's ambitious strategy of investing in wellness and prevention at a population health level, while simultaneously addressing costly chronic disease will require participation from all health and social sectors.

Join us for this dynamic event, lifting up the power of WIC as a key partner in health care reform and offering opportunities to make timely and meaningful connections to advance the transformative and historic CalAIM initiative. We will hear from and engage with our state leaders and WIC local agency staff involved in innovative efforts to improve health care data linkages and health care benefits delivery.
